Summary

I am **I Gede Bagus Arya Negara**, a **Frontend Web Developer** passionate about building clean, interactive, and user-friendly web applications. I focus on **JavaScript** and **TypeScript**, leveraging modern frontend technologies to create optimal user experiences.

Currently, I am honing my skills through a bootcamp at **DumbWays** while actively working on various projects — both individually and collaboratively.Through these experiences, I have gained hands-on expertise in developing dynamic web applications and optimizing performance.

I am also continuously expanding my knowledge in **full-stack development** to gain a comprehensive understanding of how web applications function from frontend to backend.

Technical Skills

- Programming Languages: JavaScript, TypeScript, PHP
- Frontend: React.js (Vite, Chakra UI, Tailwind CSS, Framer Motion)
- Backend & Full-Stack Frameworks: Node.js (Express.js), Laravel + Livewire
- Database: MySQL dan PostgreSQL
- Version Control: Git, GitHub (deploy menggunakan Vercel)
- Others: Postman, VS Code
